

BE THE CHANGE

.AGORIA

COVID-19 as accelerator

Need for more
competences to realise
the digital transformation

Skilled workers

Low-skilled workers

The other side of the coin

Increasing pressure on the labour market

142,000
vacancies

2019:
more than
142,000 vacancies

+0.56%
labour demand

Between now and 2030:
annual increase in labour
demand of **0.56%**

-0.11%
labour supply

Between now and 2030:
annual decrease in labour
supply of **0.11%**

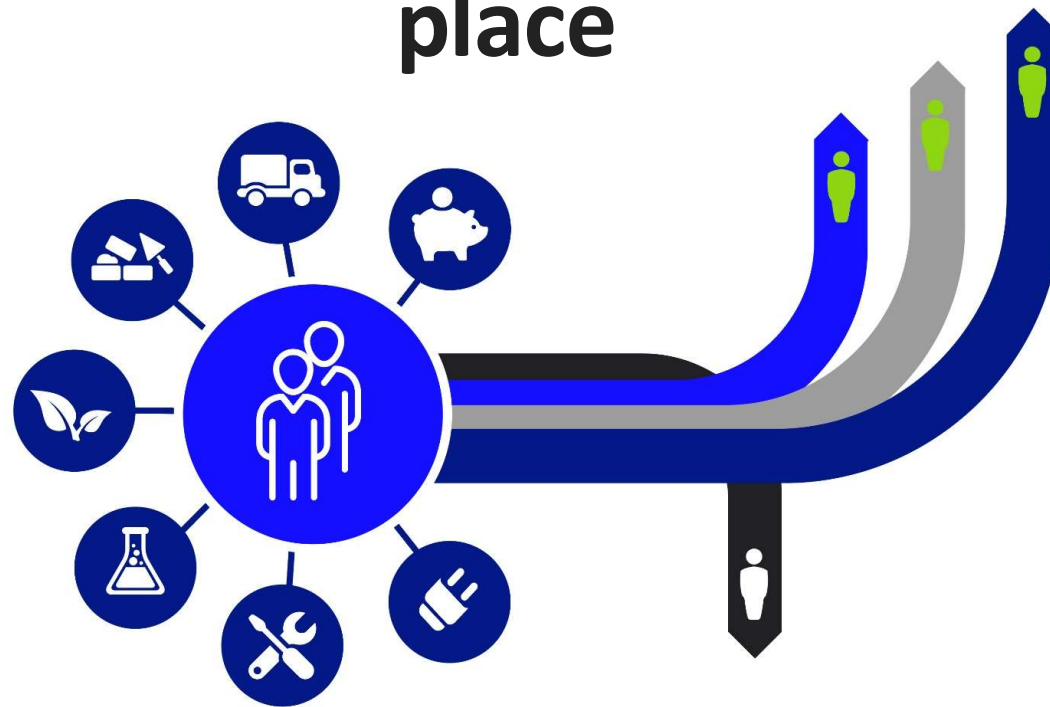

541,000
vacancies

2030:
541,000 vacancies
without extra measures

Despite corona, a positive message

Between now and 2030 – for every job that disappears – 2.8 new job offers will appear in its place

Why is an 80% employment rate important?

To maintain our international competitive position and to achieve European commitments

To give our businesses the heads and hands they need

To keep our pensions and social security affordable

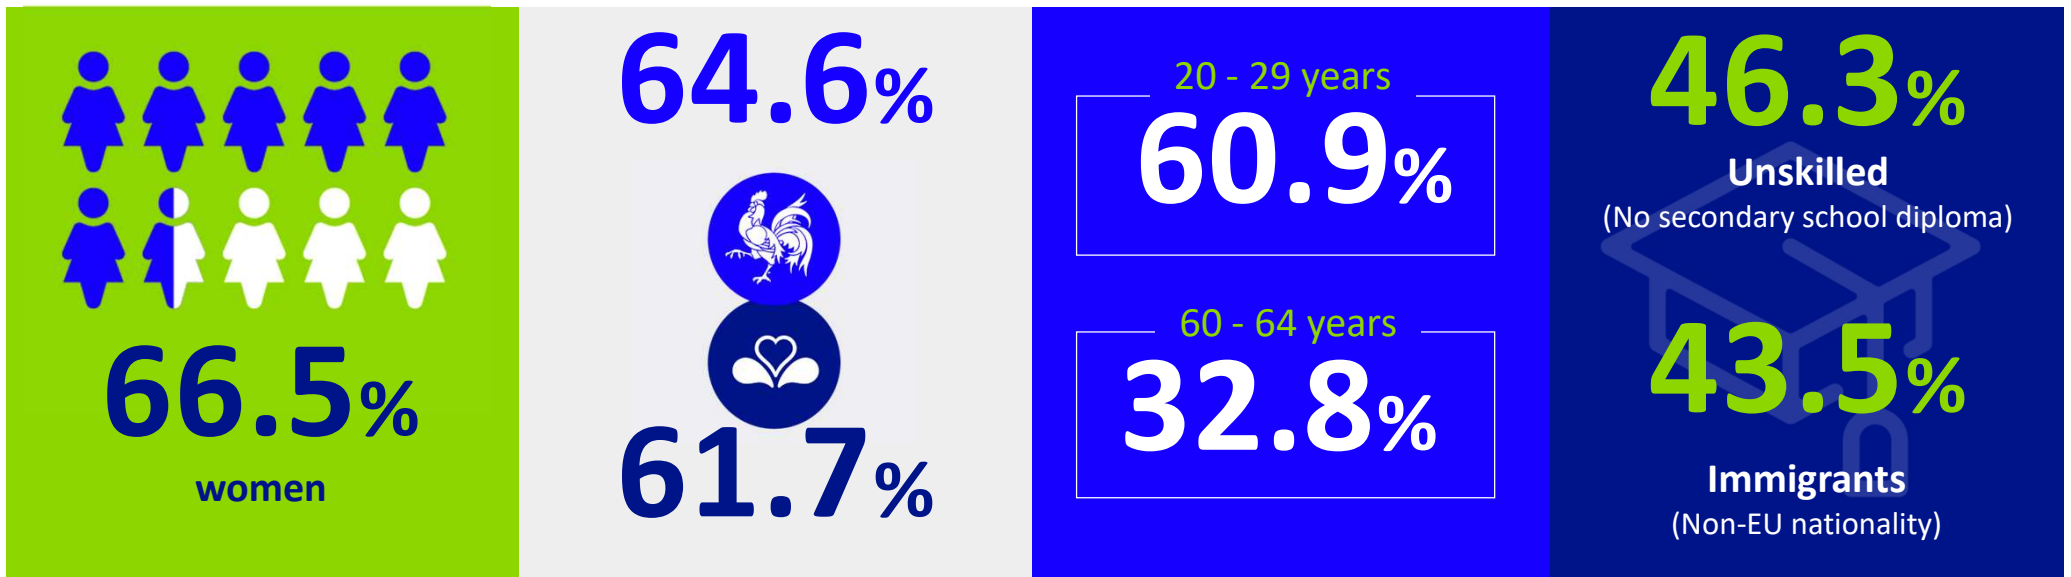

Employment rate: evolution up to today

Where can we find extra workers?

Employment rate

80% EMPLOYMENT RATE

The right people in the right place

+600,000

Getting 600,000 people
into work

Ensuring the right
competences

Making room for intake into
our labour market through
upward job mobility of all
workers

A training paradox

From 2016 to 2019

increase in training efforts
by businesses

More **accessibility**
to training

Growing **diversity**
of training formats

39.2%

of active Belgian population don't
have basic digital skills (Source: DESI)

Belgium scores **below the European
average** for 'active learning attitude' (Source:
OESO)

Just **1.9% of young people** graduate
as digital experts

Empowering people for the labour market of the future

Gaining a diploma is not
the end but the start
of a lifelong exchange

Training as
a shared responsibility

Preparing the role
of the future each day
